

## Food Processing Tables

Spaceguard manufacture a range of tables ideal for use within the food industry where hygiene is a top priority and tables need regularly washing down.

Our food processing tables can be manufactured entirely from stainless steel or for more arduous tasks (such as meat processing) can be substituted with a durable polyethylene worktop. We can further modify these tables to integrate with automation equipment and include shelves and cutouts where required.

## Features

- Fully welded robust tables ready for immediate use on site.
- Grade 304 stainless steel and food grade polyethylene used throughout.
- Fully bespoke dimensions available to ensure they can integrate with existing equipment.
- Height adjustable feet or swivel lockable castors for easy repositioning. (Stainless Steel)
- Suitable for 24/7 use with daily washdown.

## Table Accessories

- Lower Stainless Steel shelves (both rails and solid, depending on needs)
- Food grade nylon available in Red or Clear as standard
- Additional table top cut outs for drainage or integrating into existing equipment
- Nylon worktops can be removable for ease of cleaning during washdown
- Upper shelves available or product drying racks can be integrated.
- Further modifications can be included such as integrating table top scales into the worktop useful for during packing

## Food Processing Conveyors

Spaceguard manufacture a range of conveyors which have been specifically designed for use within the food industry where hygiene is a top priority. They are suitable for use within any washdown environment where cleaning regularly takes place.

Our modular conveyors are manufactured using stainless steel frames and food grade approved belting. We offer both light and heavy duty variants depending on the application and can integrate aids such as sideguides & cutouts.

## Features & Specification

- Fully welded light and heavy duty variants available depending on application.
- Grade 304 stainless steel frames & food approved belting used throughout.
- Fully bespoke dimensions available to ensure they can integrate with existing equipment.
- Height adjustable feet or swivel lockable castors for easy repositioning. (Stainless Steel)
- Suitable for 24/7 use with daily washdown.

## Conveyor Accessories

- Weighing scales can be integrated into processing lines
- Cutout sections for ease of access, ideal during cleaning
- Sideguides to keep products in place
- Variable Speed controls

## Conveyor Benefits

- Quiet running & more energy efficient
- Flexible nature of belt allows for bends and inclining sections
- Low downtime during repairs & maintenance
