

Material Dispensers & Cutters

Spaceguard manufacture both packing material dispensers and cutters as standalone products to compliment our packing table range.

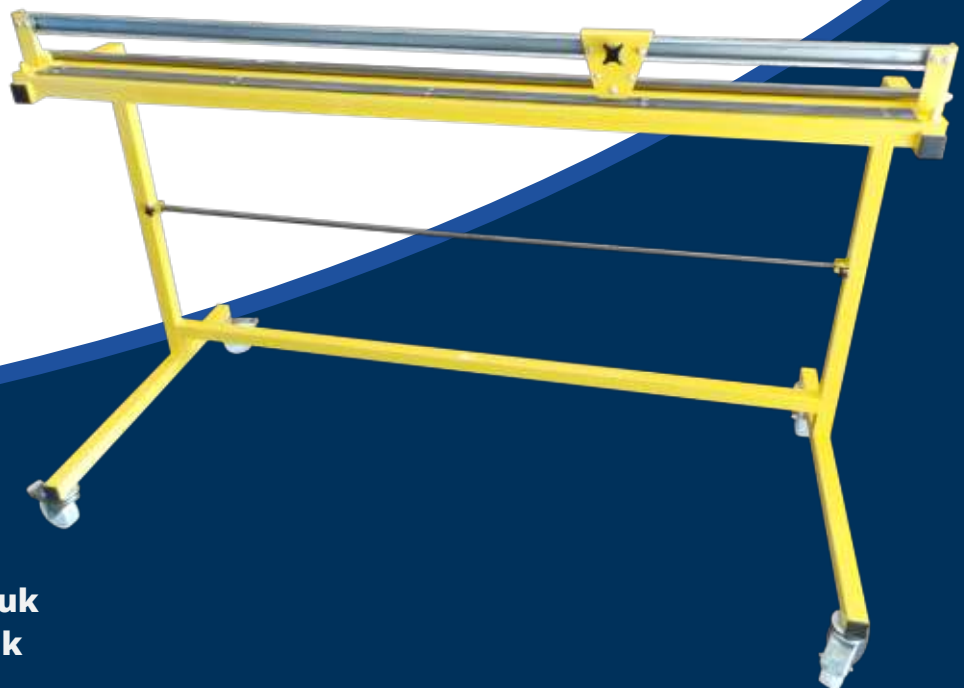

We offer standard roll dispensers which are suitable for lengths of bubble wrap/shrink film/paper roll or cardboard. These can be stationary or on castors for increased mobility/repositioning

Alternatively Void filling dispensers for centre pull rolls which can accompany workstations freeing up more packing space.

Design & Features

- Fully welded box section construction ready for immediate use.
- All dispensers available in sizes to suit depending on application. Standalone cutters available in 4 different sizes to cater to the most commonly used roll sizes (**750mm, 1000mm, 1250mm & 1500mm**)
- Standardised heights ensure cutters will take **600mm** diameter rolls.
- Swivel lockable castors available for ease of repositioning when product not required.
- Cutter design works by weighted bar holding roll in place while cutting material into required lengths effortlessly.
- Blade on cutter designed to last for years, however can be easily replaced in minutes.
- Any colour available, whether to match existing packing line or part of a new installation.
- Manufactured from our UK based factory we can supply bespoke products to accommodate any size rolls.
