

Rotary Accumulation Tables

Spaceguard manufacture high quality, robust rotary tables which are suitable for most environments including the food industry and within packhouses.

Normally positioned at the end of packing lines used to give workers additional packing time as required, these accumulation tables can be used standalone or integrated into assembly lines. Maintenance free and cost effective with a range of further modifications available ensuring you receive the ideal product to suit your needs.

Features

- Manufactured entirely from food grade materials (grade 304 stainless construction and food grade nylon top as standard)
- Standard diameters of 800mm, 1000mm, 1200mm and 1500mm available
- Supplied with either height adjustable feet or swivel lockable castors
- 50mm high sideguides as standard to keep products on the table
- Fully welded and ready for immediate use.

Additional Information

- Food Grade nylon or Stainless Steel tops available
- Surfaces can be flat or dished depending on product requirements
- Fully bespoke heights to suit existing installations
- Product can be further modified with a range of guide arms or cutouts to use with other automation equipment.
- Electrical options can include start/stop buttons Inverters and e-stops
