

ESD Worktops & Matting

Spaceguard is a UK manufacturer of robust industrial workbenches.

With a wide range of options and accessories to choose from, we can design and manufacture an electronics workstation to suit your specific needs.

Our helpful sales team listens to your requirements and works with you to determine the optimum workstation design, worktop material, and accessories to suit your workspace and process.

Below you can find some brief information about our range of ESD Worktops and ESD Bench Matting.

Please contact our helpful sales team if you have any questions.

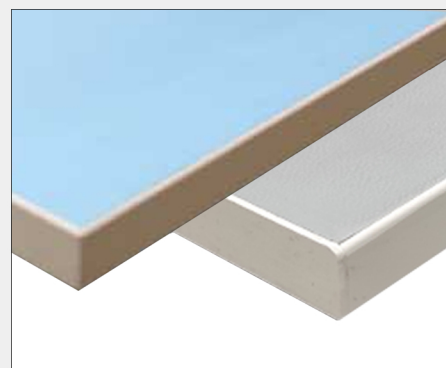

ESD Rubber

The ESD Rubber worktop surface is comprised of two layers, the top being dissipative, whilst the bottom layer is conductive. The worktop finish is textured which provides a comfortable non-slip work area that also prevents glare.

Thickness: 20mm

Resistance: $10^7 - 10^9 \Omega$

Colour: Grey / Blue

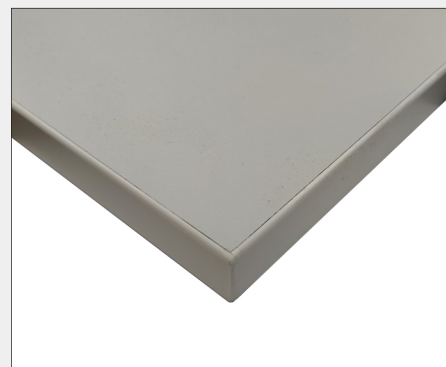

ESD Laminate

The ESD Laminate worktop is manufactured from plastic laminate with a static dissipative top. The worktop is resistant to heat, solder, and most chemicals. It is also easy to clean, making this a durable and easy to maintain worktop option.

Thickness: 20mm

Resistance: $10^6 - 10^8 \Omega$

Colour: Grey

ESD Matting

A range of ESD matting is available including hard wearing conductive mats, dissipative bench matting, and both smooth and textured rubber bench matting.

Thickness: 2mm

Resistance: $10^6 - 10^8 \Omega$

Colour: Grey, Blue, Beige
